Normuslim:

The paper " Multicultural Education in Indonesia: An Islamic Perspective " has been preliminarily reviewed.

Reviewers have given their comments on your paper. Please do the following when you resubmit your revised version:

- (i) All corrections as per the reviewers' comments and prepare a table / response letter showing corrections done. Your corrections will not be accepted in the absence of this response letter / table.
- (ii) All authors' names, emails and affiliations checked and corrected
- (iii) Add ORCID IDs of all authors

Please ensure the submission of the revision within 1 month of receiving this mail either both as a reply to this mail and in the online system.

The paper can be resubmitted for a review after huge improvements, and this does not guarantee it will be approved.

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

**Reviewer 1**

Though the title of the paper refers to Multicultural Education only in Indonesian perspective, the introduction makes a global view and the selection of variables content integration, equality pedagogy, empowering culture, prejudice reduction and knowledge construction etc. are also seen in a broad perspective. The author suggests that multicultural education is best provided in the educational institutions, especially at school level. This is difficult to understand when the Indonesian society is not so multi-cultural at the school level, the author talks of unity in heterogeneity, but there was no evidence of the multicultural face of the Indonesian society. The author may like to look into this issue. Last, but not the least, there are 11 hypotheses which is very difficult to justify in a short study like this.

**Reviewer 2**

The title does not refer to any inquiry or investigation but hints at a kind of overview of the Islamic perspective of multicultural education in Indonesia. The abstract also does not say about the objectives of doing this study. It only relates the variables and their relationship. The abstract must give an equal weightage to purpose, methodology,

findings and Implications for Research and Practice. (Please put these headings as per journal format) Please define the purpose and objective clearly in the title, abstract, last paragraph of introduction, methodology and lastly in discussion.

There is no literature review in your paper. Please create a section and include all the hypothesis in that section. More studies need to be added to support the hypotheses development. It is suggested that in LR section you choose a few previous studies comprising empirical and field studies (including those what you have already mentioned) and present their findings and results.

You need to show that these studies and their findings were not enough for the study of the subject and therefore a study was needed. Please add more information in the last paragraph of this section showing what the problems are (e.g. lack of research, not much attention paid on the subject and how this research aimed to fill the research gap. The method section must contain 4 subheadings Participants, Instruments, Procedure, and Data analysis. Which research design did you use for this research? Qualitative approach, or quantitative? Please be specific and cite the reason for selecting the research design.

Results section is Ok. Discussion section only contain summary of main results without repeating the findings, give references to previous research which agree or disagree with your findings. Do not add any new information. The final section is called Conclusion, Recommendations and Implications. It must include a brief conclusion of the research completed, limitations, recommendation for future research and implications for research and practice. A conclusion should summarize the findings and show how the study contributes to the domain of research. Please revise

Lastly, check English language and syntax errors. spellings and typos and also the presentation style.

**To: Normuslim** <dr.nor.muslim@gmail.com>

Normuslim:

The paper "Multicultural Education in Indonesia: An Islamic Perspective" has been reviewed again.

Good improvements have been made to the paper. However, there are still minor improvements to be made.

Some considerations:

- 1) Update the abstract in your native language. A small change has been made to the English version.
- 2) There are still missing some relevant information in the research methodology section.

Please ensure the submission of the revision within 1 month of receiving this mail either both as a reply to this mail and in the online system.

The paper can be resubmitted for a review after huge improvements, and this does not guarantee it will be approved.

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.
