

CHAPTER VI

CLOSER

This chapter discusses the result of development of the study related to the product conclusion and suggestion.

A. Conclusion

The conclusions of this research and development are:

1. Most of the teachers and students are less satisfied or dissatisfied with the type of their worksheet in the school, because there is less suitable worksheet and less help teachers and students understand the material in teaching and learning.
2. Teachers and students feel a worksheet that is less attractive, so they are expecting a new worksheet in the form or appearance that interest them, so that increasing their attractiveness to learn English and do the questions in the worksheet.
3. Multiple choice, matching word, and the question with media images questions that are kind of well-liked teacher and student.
4. Student and teacher responses to the worksheet outstanding in their school belong to the category of negative responses, because many of those who have difficulty in communicating or understanding the content of the material in the worksheet.
5. In this study, the writer focuses at the first stage in R & D research or it can be

called with “A Preliminary R&D Research”. Therefore, the writer focuses to know the needs of the students and teachers about English worksheet.

B. Suggestion

The suggestion utilization and further development are as follows:

1. Suggestion Utilization

The author suggested that this worksheet has been perfected in accordance with the needs of students and teachers learning the material used in sign and symbols, talking about people, and describing people.

2. Further Development Advice

This worksheet further developed and adapted to the curriculum in 2013. For the next researchers who are interested in continuing this type of research is R & D, English worksheet need to be made to other materials for learning English more interesting and enjoyable with reference to this English worksheet and attention deficiencies to be remedied and the next researchers must finish this research to produce a product, that is a worksheet.
