17. Students’ responds about their comprehension on the worksheet in the school

There were 72 students, responded answered “B” related their comprehension on the worksheet in the school to show the worksheet was less easy to understand and to work on it because based on observation on August 26, 2014, it was found that some of students did not know the vocabulary, so that they had a problem to understand and work on the students worksheet. According to Hartono’s theory about students worksheet, students’ responses with the value 71-80 was “good” or “effective”.
18. Students responds about their opinion in students worksheet that circulating in their schools are students worksheet help their in learn English language

There were 79 students responded to answer “A” to show that the worksheet helped them in learning English. Based on observation on August 26, 2014, it was found that the students felt the worksheet gave a questions for understanding the material and increas their knowledge and vocabullary in English. In other worksheet, they practiced to learn it. According to Hartono’s theory about students worksheet, students responses with the value of 71-80 was “good” or “effective”.

![Pie chart showing student responses]

- A: 79 (it helps in learning English)
- B: 19% (sometimes it helps in learning English)
- C: 0% (does not helps in learning English)
- D: 2 (another idea)
There were 78 students responded answer “A” to show that they were very active and always worked on worksheet. Based on observation on August 26, 2014, it was found that the students said the worksheet gave effect on their test achievement. According to Hartono’s theory about students worksheet, students’ responses with the value of 71-80 was “good” or “effective”.
20. Students responds about the influence of worksheet on students’ academic achievement

There were 82 students chose answered “A” to respond to the influence of students test based on students activeness on working on worksheet students’ test achievement. Based on observation on August 26, 2014, it was found that the students understand more in English through the worksheet. According to Hartono’s theory about students worksheet, students’ responses with the value 81-100 was “very good” or “very effective”.
21. Students’ ability in answering test question after working on the worksheet

Based on aspects students ability, 68 students responded to answer A about their ability to answer all of questions after following students worksheet to show that they were able to answer all of the question test. Based on observation on August 26, 2014, it was found that there was students saying that they answer the questions can. According to Hartono’s theory about students worksheet, students’ responses with the value of 61-70 “good enough” or “enough effective”.
22. Students’ responds ability in answering the test

Based on aspect students responses 84 students, responded to answer B to show that the question which were answered during the test were all of the question in the worksheet. The students responded were sometimes a half of the question which were the worksheet. Based on observation on August 26, 2014, it was found that the teacher made the question by themselves to try their understanding based on the material. According to Hartono’s theory about students worksheet, students’ responses with the value of 80-100 was “very good” or “very effective”.
There were 67 students, responded that the students study hard with the students worksheet presented in their school. The students chose A with answer yes, stating that they were more active in learning using students worksheet. Based on observation on August 26, 2014, it was found that students worksheet could improve their vocabulary, their understanding about material that teachers conducted. According to Hartono’s theory about students worksheet, students’ responses with the value of 61-70 was “less good” or “less effective”.
24. Students comprehension in English lesson using the worksheet.

There were 76 students chose answer A, they responded about their comprehension in English lesson using the worksheet, was better than using English worksheet. The answered of students was yes, it means they were the more better using worksheet. Based on observation on August 26, 2014, it was found that it could help them to understand the materials and answered questions to practice English language. According to Hartono’s theory about students worksheet, students’ responses with the value of 71-80 was “good” or “effective”.
25. Students responds ability to describe the materials the worksheet

There were 63 students, that they were sometimes able to describe the material in the worksheet existing in the school. Students responded to answer B as their answers. Based on observation on August 26, 2014, it was found that they did not know new vocabulary so that they were confused of what material on the worksheet about. According to Hartono’s theory about students worksheet, students’ responses with the value of 61-70 was “less good” or “less effective”.
26. Students responds about the difference of understanding material using worksheet

There were 75 students, responded to answer B about a difference in understanding the subjects presented using worksheet. The students responded that there were less difference understood. Based on observation on August 26, 2014, it was found that sometimes they misunderstood about the worksheet because they were unfamiliar with the vocabulary in the worksheet. According to Hartono’s theory about students worksheet students responses with the value of 71-80 was “good” or “effective”. 
27. Students respond about the understanding learning in English easy worksheet

There were 82 students, responded to answer A about their understanding in English was better using the worksheet or no. The answered is yes, more better using students worksheet. Based on observation on August 26, 2014, it was found that students could improved their vocabullaries, more simple and their could practice to understand English language. According to Hartono’s theory about students worksheet students responses with the value of 81-100 was very “good” or “very effective”.

![Pie chart showing the responses of students. A: More better used students worksheet (60%), B: Sometimes more better use students worksheet (12%), C: Same use students worksheet or not (6%), D: Another idea (12%).]
28. Students responds the difference in learning achievement

There were 75 students, responded to answer A to show that their learning achievement in studying using worksheet was increased. Based on observation on August 26, 2014, it was found that state some of the students practice more by using students worksheet. According to Hartono’s theory about students worksheet students responses with the value of 71-80 was “good” or “effective”.

- A=the students increase their learning achievement
- B=students learning achievement had increased sufficiently
- C=students’ learning achievement has not increase
- D=another idea
B. The Teachers’ Response

1. Teacher responds about worksheet in the school

Based on the aspect interesting, 10 teachers chose to answer D based on their own opinions, the worksheet in the was good enough and interesting. Based on observation on August 27 2014, the teacher felt that the worksheet was enough good because there were some material which was not suitable and there were material which was suitable.

2. Teacher responds about appropriate worksheet
