## CHAPTER IV

## RESULT OF THE STUDY

In this chapter, the writer presented the data which had been collected from the research in the field of study. The data are the description data of pre test score of experimental and control class, the description data of pre-test score of experimental and control class, testing of normality and homogeneity (normality test and testing homogeneity), result of data analysis, and discussion.

## A. Data Presentation

This section describes the obtained data of the Effects of Using Multiple-Choice Test to the Students Scores in Learning vocabulary.

## 1. The Description Data of Pre-Test Score

The students' pre test scores is distributed in the following table in order to analyze the students' knowledge beforee conducting the treatment.

Based on KKM (Minimum Standard Scores of English subject of SMPMuhammadiyah Palangka Raya, the minimum mastery criterion (KKM) in English course is 70.

## The qualifications of range score

| Range Score | Classification |
| :---: | :---: |
| $90-100$ | Excellent |
| $80-89$ | Very Good |
| $70-79$ | Good |
| $60-69$ | Enough |
| $0-59$ | Poor |

Table 4.1 Pre test score of experimental and control group

| Experiment Group |  |  |  | Control Group |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Code | Score | Correct Answer | Classification | Code | Score | Correct Answer | Classification |
| E-01 | 83 | 25 | Very Good | C-01 | 33 | 10 | Poor |
| E-02 | 70 | 21 | Good | C-02 | 43 | 13 | Poor |
| E-03 | 80 | 24 | Very Good | C-03 | 43 | 13 | Poor |
| E-04 | 83 | 25 | Very Good | C-04 | 63 | 19 | Enough |
| E-05 | 73 | 22 | Good | C-05 | 63 | 19 | Enough |
| E-07 | 73 | 22 | Good | C-07 | 73 | 22 | Good |
| E-08 | 46 | 14 | Poor | C-08 | 56 | 17 | Poor |
| E-09 | 80 | 24 | Very Good | C-09 | 50 | 15 | Poor |
| E-10 | 53 | 16 | Poor | C-10 | 56 | 17 | Poor |
| E-11 | 70 | 21 | Good | C-11 | 50 | 15 | Poor |
| E-12 | 80 | 24 | Very Good | C-12 | 53 | 16 | Poor |
| E-13 | 83 | 25 | Very Good | C-13 | 60 | 18 | Enough |
| E-14 | 86 | 26 | Very Good | C-14 | 63 | 19 | Enough |
| E-15 | 53 | 16 | Poor | C-15 | 56 | 17 | Poor |
| E-16 | 63 | 19 | Enough | C-16 | 60 | 18 | Enough |
| E-17 | 73 | 24 | Good | C-17 | 60 | 18 | Enough |
| E-18 | 90 | 27 | Excellent | C-18 | 60 | 18 | Enough |
| E-19 | 73 | 22 | Good | C-19 | 56 | 17 | Poor |
| E-20 | 83 | 25 | Very Good | C-20 | 63 | 19 | Enough |
| E-21 | 63 | 19 | Enough |  |  |  |  |
| E-22 | 83 | 25 | Very Good |  |  |  |  |
| E-23 | 53 | 16 | Poor |  |  |  |  |
| E-24 | 93 | 28 | Excellent |  |  |  |  |
| Total |  | $\begin{gathered} \mathbf{1 7 7 3} \\ \mathbf{7 3 , 8 8} \end{gathered}$ |  | Total |  | 1137 |  |
| Average |  |  |  | Average |  | 56,85 |  |
| Lowest Score |  | $\begin{gathered} 73,88 \\ 46 \end{gathered}$ |  | Lowes | Score | 33 |  |
| Higher Score |  | 93 |  | Higher Score |  | 73 |  |

The table above shows us the comparison of pre-test score achieved by experimental and control group students, both class' achievement are at most the same level. It can be seen that from the students' score. The highest score is 93 and the lowest score is 46, experimental.

The highest score (H) : 93
The lowest score (L) : 46
The range of score (R) $\quad=H-L+1$
$=93-46+1$
$=47+1$
$=48$
Interval of temporary $(\mathrm{I})=\frac{\mathrm{R}}{\mathrm{K}}=\frac{48}{5}=9.6$
The highest score is 73 and the lowest score is 33 control group. It meant that the experimental and cintrol group have most the same level in level in learning multiple choice items by descriptive text before giving the treatment.

The highest score (H) : 73
The lowest score (L) : 33
The range of score (R) $\quad=\mathrm{H}-\mathrm{L}+1$
$=73-33+1$
$=40+1$
$=41$
Interval of temporary $(\mathrm{I})=\frac{\mathrm{R}}{\mathrm{K}}=\frac{41}{5}=8.2$

## The distribution of students' pretest score of experiment group can

also be seen in the following figure 4.1.

## Then, the distribution of students' pre-test score of control group can

 also be seen in the following figure 4.2.

Figure 4.2. the students' predicate in pre-test score of control group

## 2. The description Data of Post-Test Score

The students' scores are distributed in the following table in order to analyze the students' knowledge after conducting the treatment.

Based on KKM (Minimum Standard Scores of English subject of SMP Muhammadiyah Palangka Raya, the minimum mastery criterion (KKM) in English course is 70.

The qualifications of range score

| Range Score | Classification |
| :---: | :---: |
| $90-100$ | Excellent |
| $80-89$ | Very Good |
| $70-79$ | Good |
| $60-69$ | Enough |
| $0-59$ | Poor |
|  |  |

Table 4.2 Post-test of experimental and control group

| Experiment Group |  |  |  | Control Group |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Code | Score | Correct Answer | Classification | Code | Score | Correct Answer | Classification |
| E-01 | 86 | 26 | Very Good | C-01 | 36 | 10 | Poor |
| E-02 | 96 | 29 | Excellent | C-02 | 70 | 21 | Good |
| E-03 | 96 | 29 | Excellent | C-03 | 33 | 10 | Poor |
| E-04 | 86 | 26 | Very Good | C-04 | 56 | 17 | Poor |
| E-05 | 93 | 28 | Excellent | C-05 | 66 | 20 | Enough |
| E-06 | 100 | 30 | Excellent | C-06 | 76 | 23 | Good |
| E-07 | 80 | 24 | Very Good | C-07 | 80 | 24 | Very Good |
| E-08 | 90 | 27 | Excellent | C-08 | 76 | 23 | Good |
| E-09 | 96 | 29 | Excellent | C-09 | 50 | 15 | Poor |
| E-10 | 83 | 25 | Very Good | C-10 | 83 | 20 | Very Good |
| E-11 | 90 | 27 | Excellent | C-11 | 53 | 23 | Poor |
| E-12 | 93 | 28 | Excellent | C-12 | 50 | 24 | Poor |
| E-13 | 90 | 27 | Excellent | C-13 | 76 | 25 | Good |
| E-14 | 100 | 30 | Excellent | C-14 | 66 | 20 | Enough |
| E-15 | 83 | 25 | Very Good | C-15 | 60 | 23 | Enough |
| E-16 | 90 | 27 | Excellent | C-16 | 50 | 20 | Poor |
| E-17 | 80 | 24 | Very Good | C-17 | 43 | 21 | Poor |
| E-18 | 100 | 30 | Excellent | C-18 | 76 | 23 | Good |
| E-19 | 80 | 24 | Very Good | C-19 | 76 | 23 | Good |
| E-20 | 96 | 29 | Excellent | C-20 | 76 | 23 | Good |
| E-21 | 96 | 24 | Excellent |  |  |  |  |
| E-22 | 93 | 28 | Excellent |  |  |  |  |
| E-23 | 53 | 16 | Less |  |  |  |  |
| E-24 | 93 | 28 | Excellent |  |  |  |  |
| Total |  | $\begin{gathered} 2143 \\ 89,29 \end{gathered}$ |  | Total |  | 1252 |  |
| Average |  |  |  | Average |  | 62,6 |  |
| Lowest Score |  | 89,2953100 |  | Lowe | Score | 33 |  |
| Higher Score |  |  |  | Highe | Score | 83 |  |

The table above shows us the comparison of post-test score achieved by experimental and control group students, both classes' achievement are at most the same level. It can be seen that from the
students' score. The highest score is 100 and the lowest score is 53 , experimental.

The highest score (H) : 100
The lowest score (L) : 53
The range of score (R) $\quad=H-L+1$
$=100-53+1$
$=47+1$
$=48$
Interval of temporary $(\mathrm{I})=\frac{\mathrm{R}}{\mathrm{K}}=\frac{48}{5}=9.6$

The highest score is 83 and the lowest score is 33 control group. It meant that the experimental and control group have different level in learning multiple choice test by descriptive text after getting the treatment.

The highest score (H) : 83
The lowest score (L) : 33
The range of score (R) $\quad=H-L+1$
$=83-33+1$
$=50+1$
$=51$
Interval of temporary $(\mathrm{I})=\frac{\mathrm{R}}{\mathrm{K}}=\frac{51}{5}=10.2$

The distribution of students' post-test score of experiment group can also be seen in the following figure 4.2

Histogram
For group $=$ experimental

The distribution of students' post-test score of control group can
also be seen in the following figure 4.3.
Histogram
For group $=$ control

## B. Testing of Normality and Homogeneity

## 1. Normality Test

The testing of normality test used SPSS 20.0 program. It is divided into two parts, testing of normality of pre test and post-test both experimental and control group.

Table 4.2 Testing normality of post-test experimental and control group

| Tests of Normality |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Control Class and Experiment Class |  | Kolmogorov-Smirnov ${ }^{\text {a }}$ |  |  | Shapiro-Wilk |  |  |
|  |  | Statistic | Df | Sig. | Statistic | Df | Sig. |
| Score | Control Class | ,197 | 20 | ,041 | ,883 | 20 | ,020 |
|  | Experiment Class | ,213 | 22 | ,011 | ,771 | 22 | ,000 |
| a. Lilliefors Significance Correction |  |  |  |  |  |  |  |

The table shows the result of test of normality calculation using SPSS 20.0 program.

To know the normality of data, the formula can be seen as follows:
If the number of sample. $>50=$ Kolmogorov-Smirnov
If the number of sample. $<50=$ Shapiro - Wilk
Based on the number of data the writer was $42<50$, so to analyzed normality data the writer used Shapiro-Wilk. The next step, the writer analyzed normality of data by using formula as follows:

If significance $>0,05=$ data is normal distribution
If significance $<0,05=$ data is noot normal significance
Based on data above, significant data of experiment and control group used Shapiro-Wilk is $0,020>0,05$ and 0,000 . It can be concluded
that the data is normal distribution for control class and experiment class is not normal distribution.

## 2. Testing Homogeneity

Testing homogeneity used SPSS 10.0 program. The result of testing homogeneity of post-test of experimental and control group can be seen on the table 4.4.

The table 4.4. Testing Homogeneity and Independent samples test of Post-Test of Experiment and Control Group

| Independent Samples Test |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Levene's Test for Equality of Variances |  | t-test for Equality of Means |  |  |  |  |  |  |
|  |  | F | Sig. | T | df | Sig. (2tailed) | Mean Difference | Std. <br> Error Difference | 95\% Confidence Interval of the Difference |  |
|  |  |  |  |  |  |  |  |  | Lower | Upper |
| Score of Students Post-test | Equal variances assumed | 8,898 | ,005 | -6,473 | 40 | ,000 | -26,827 | 4,145 | -35,204 | -18,450 |
|  | Equal variances not assumed |  |  | -6,330 | 30,863 | ,000 | -26,827 | 4,238 | -35,473 | -18,182 |

The table shows the result of Homogenity test calculation using SPSS 20.0 program. To know the Homogenity of data, the formula can be seen as follows:

If Sig. $>0,01=$ Equal variances assumed or Homogenity distribution.
If Sig. $<0,01=$ Equal variances not assumed or not Homogenity distribution.
Based on data above, significant data is 0,005 . The result is 0,005 $<0.01$, it mean the t -test calculation used at the equal variances assumed or data is Homogenity distribution.

## C. The Result of Data Analysis

## 1. Descriptive Calculation of Data Analysis

An analysis of descriptive calculation of data analysis used SPSS 20.0 program to show mean, median, standart deviation, ranges and variances it is showed on table 4.7. and 4.8.

Table 4.5. Descriptive Calculation of data analysis of pre-test of
control and experiment group.

| Descriptives |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Group of Students |  |  |  | Statistic | Std. Error |
| Score of <br> Pre-test <br> Control and <br> Experiment | Control | Mean |  | 56,85 | 2,226 |
|  |  | 95\% Confidence Interval for Mean | Lower Bound | 52,19 |  |
|  |  |  | Upper Bound | 61,51 |  |
|  |  | 5\% Trimmed Mean |  | 57,11 |  |
|  |  | Median |  | 58,00 |  |
|  |  | Variance |  | 99,082 |  |
|  |  | Std. Deviation |  | 9,954 |  |
|  |  | Minimum |  | 33 |  |
|  |  | Maximum |  | 76 |  |
|  |  | Range |  | 43 |  |
|  |  | Interquartile Range |  | 12 |  |
|  |  | Skewness |  | -,432 | ,512 |
|  |  | Kurtosis |  | ,952 | ,992 |
|  | Experiment | Mean |  | 73,95 | 2,549 |
|  |  | 95\% Confidence Interval for Mean | Lower Bound | 68,65 |  |
|  |  |  | Upper Bound | 79,25 |  |
|  |  | 5\% Trimmed Mean |  | 74,60 |  |
|  |  | Median |  | 76,50 |  |
|  |  | Variance |  | 142,903 |  |
|  |  | Std. Deviation |  | 11,954 |  |
|  |  | Minimum |  | 46 |  |
|  |  | Maximum |  | 90 |  |
|  |  | Range |  | 44 |  |
|  |  | Interquartile Range |  | 15 |  |
|  |  | Skewness |  | -,951 | ,491 |
|  |  | Kurtosis |  | ,156 | ,953 |

The table shows first, the descriptive calculation of data analysis of pre-test control group. The result of mean calculation is 56,85 , the result of median calculation is 58,00 , and the result of ranges calculation is 43 . The result of standard deviation is 9,954 . The result of standard error of mean calculation is 2,226 . Second, the result of descriptive result of data
analysis of pre-test of experimental group. The result of mean calculation is 73,95 , the result of median calculation is 76,50 and the result of ranges calculation is 44 . The result of standard deviation is 11,954 . The result of standard error of mean calculation is 2,549 .

Table 4.6. Descriptive Calculation of data analysis of post-test of control and experiment group.

| Descriptives |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Group of Students |  |  |  | Statistic | Std. Error |
| Score of <br> Post-test <br> Control <br> and <br> Experiment | Control | Mean |  | 62,40 | 3,662 |
|  |  | $\mathbf{9 5 \%}$ Confidence Interval for Mean | Lower Bound | 54,73 |  |
|  |  |  | Upper Bound | 70,07 |  |
|  |  | 5\% Trimmed Mean |  | 62,89 |  |
|  |  | Median |  | 66,00 |  |
|  |  | Variance |  | 268,253 |  |
|  |  | Std. Deviation |  | 16,378 |  |
|  |  | Minimum |  | 33 |  |
|  |  | Maximum |  | 83 |  |
|  |  | Range |  | 50 |  |
|  |  | Interquartile Range |  | 26 |  |
|  |  | Skewness |  | -,675 | ,512 |
|  |  | Kurtosis |  | -,873 | ,992 |
|  | Experiment | Mean |  | 89,23 | 2,133 |
|  |  | $\mathbf{9 5 \%}$ Confidence Interval for <br> Mean | Lower Bound | 84,79 |  |
|  |  |  | Upper Bound | 93,66 |  |
|  |  | 5\% Trimmed Mean |  | 90,51 |  |
|  |  | Median |  | 91,50 |  |
|  |  | Variance |  | 100,089 |  |
|  |  | Std. Deviation |  | 10,004 |  |
|  |  | Minimum |  | 53 |  |
|  |  | Maximum |  | 100 |  |
|  |  | Range |  | 47 |  |
|  |  | Interquartile Range |  | 11 |  |
|  |  | Skewness |  | -2,375 | ,491 |
|  |  | Kurtosis |  | 7,775 | ,953 |

The table shows first, the descriptive calculation of data analysis of post-test of control group. The result of mean calculation is 62,40 , the result of median calculation is 66,00 , and the result of ranges calculation is 50 . The result of standard deviation is 16,378 . The result of standart error of mean calculation is 3,662 . Second, the descriptive result of data analysis of p0sttest of experiment group. The result of mean calculation is 89,23 , the result
of median calculation is 91,50 and the result of ranges calculation is 47 . the result of standart deviation is 10,004 . The result of standard error of mean calculation is 2,133.

## 2. Testing Hypothesis Using Calculation of T-Test used SPSS 20.0

## Program.

The last step on data analysis was testing hypothesis using calculation of T-test used SPSS 20.0 program.

Table 4.6. Testing Hypothesis Using Calculation of T-test used SPSS

## 20.0 program.

| Independent Samples Test |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Levene's Test for Equality of Variances |  | t-test for Equality of Means |  |  |  |  |  |  |
|  |  | F | Sig. | T | df | Sig. (2- | Mean | Std. <br> Error | $\mathbf{9 5 \%} \mathrm{C}$ Diff | fidence of the nce |
|  |  |  |  |  |  |  |  |  | Lower | Upper |
| Score of Students Post-test | Equal variances assumed | 8,898 | ,005 | -6,473 | 40 | ,000 | -26,827 | 4,145 | -35,204 | -18,450 |
|  | Equal variances not assumed |  |  | -6,330 | 30,863 | ,000 | -26,827 | 4,238 | -35,473 | -18,182 |

The table above shows score on " $T$ " on equal variances assumed is 6,330 with sig. (.000) two tailed. To know the testing hypothesis of data used SPSS 20.0 program, the formula can be seen as follows:

Ho : If score sig. (2-tailed) $>0,05$ it means Ho was accepted and Ha was rejected.

Ha : if score sig. (2-tailed) < 0,05 it means Ha was accepted and Ho was rejected.

Based on the data above, significant probability (sig. 2-tailed) is 0,000 . The result is $000<0,05$, it means Ha was accepted and Ho is rejected. From the result of testing hypothesis using calculation of $t$-test, it is shows that multiple-choice test is effective to the students' scores in learning vocabulary of the Eighth Grade students of SMP Muhammadiyah Palangka Raya.

## D. Discussion

The result of analysis shows that there is significant effect of using multiple-choice test to the students' scores in learning vocabulary for the eighth grade students at SMP Muhammadiyah Palangka Raya.

The aim of the test is to know the students' scores in reading descriptive and recount text by using multiple choice test as the media for the eight grade student of SMP Muhammadiyah palangka Raya.

In the pretest, the average scores of the experimental group and the control group were 73.88 and 56.85.

From the pre-test it can be said that the ability of the two groups was relatively the same. After they received the treatment, the average score of the experimental group was higher than the control group. The experimental group got 89.29 and the control group got 62.6.From the scores it can be concluded that the two groups were homogenous, because there was only slight difference in result between the experimental group and the control one. After receiving the different treatments the score of the experimental group and the control group was different. The average scores of the experimental group were higher than the score of the control group. In
teaching descriptive and recount text to the experimental group the writer used multiple choice test as the media where in the control group, the writer taught the students by using the cloze test.

The test could prove that teaching reading descriptive and recount text using multiple choice test as the media to the eight grade students of SMP Muhammadiyah Palangka Raya was more effective.

Those are the result of post-test for experimental group and control group of students of SMP Muhammadiyah. Based on the writer's result and the theory, multiple-choice test gave significance effect for the students' scores in learning vocabulary of the eighth grade students of SMP Muhammadiyah Palangka Raya. It supported the previous study by Anak Agung Gede Hendra in chapter II page 9 stated that "reading comprehension of the seventh grade students of SMPN 2 Tampaksiring was considered to be good enough and their ability in comprehending reading text which were assessed by using multiple choice test were categorized to be successful.
